

Horizon Yard Dog Transformer Kit

The Horizon HOA Buster Transformer, coupled with your chain link fence, creates a system that makes your HF station become an on-the-air multi-band marvel.

All you need is the Yard Dog Transformer, and a feedline. It's perfect for **HOA-Busting** temporary or permanent installs.

The Horizon Opti-Maxx Transformer gives immediate access to several HF bands. It follows your transceiver and changes bands without pushing any buttons, adding any ground radials, or re-tuning. You can work more stations in less time than ever before. Plus, it is priced less than most cumbersome and marginal antennas sold by other companies.

INSTALLATION:

Just tighten the included aluminum clamps, attach a feedline and start making contacts.

NOTE: The photos show the Horizon Yard Dog HOA Buster installed at the center of a 120-foot chain link fence. You may locate it at various positions for different results.

SWR PLOTS:

Band	Band Width	VSWR
6 M	Entire Band	1.0:1 to 1.5:1
10 M	Entire Band	1.1:1
12 M	Entire Band	1.1:1
15 M	Entire Band	1.4:1 to 1.7:1
17 M	Entire Band	1.5:1
20 M	Entire Band	1.2:1
30 M	Entire Band	1.4:1
40 M	Entire Band	1.2:1 to 1.5:1
80 M	Entire Band	2.2:1 to 2.5:1
160 M	Entire Band	1.0:1

These results are without a tuner
