

# Horizon Wanderer Vertical Antenna

Wouldn't it be fun to have an ultra-portable antenna that you could backpack with that weighs less than 3 lbs., but that reaches out and grabs six meters to 80 meters? This antenna fits easily in the 5" x 32" bag and sets up in minutes without having to throw a wire.

## SWR PLOTS:

Band	Band Width	VSWR
6 M	Entire Band	1.1:1
10 M	Entire Band	1.1:1
12 M	Entire Band	1.1:1
15 M	Entire Band	1.1:1
17 M	Entire Band	1.1:1
20 M	Entire Band	1.1:1
30 M	Entire Band	1.1:1
40 M	Entire Band	1.4:1 to 1.5:1
80 M	Entire Band	1.9:1 to 2.3:1

These results are without a tuner

The antenna has a 3/8x24 screw-in base that fits perfectly in the top of the included spike mount. The box easily removes by loosening the wingnuts on the included clamps which slide onto the antenna base. So much fun!
